FDSN Working Group V
Portable Instrumentation
Thursday August 3, 2017 12:00-13:30
Room 503

12:00   Introductions and sign-in

12:05   Review of agenda and additions

12:05   Group/facility presentations

12:20   SOH recommendations – suggestions on how best to make progress

12:30   How to better track in meta-data stations that move (e.g. deployments on glaciers or oceans gliders)

12:40   Survey of available methods for creating StationXML

12:50   OBS data
- Accounting for OBS clock drift
- Current state of OBS integration into data centers and future paths/roadblocks
- Standard methods/filters for decimating seismology data

13:15   WG-V web presence
Request for web page updates. QC, best practices, or inventories. Lots of broken links. Are these sections worth maintaining?

13:30   Adjourn
